Mailone 2.0 Ship.it

Introducing the FP MailOne 2.0 Ship It bundle. FP's most flexible mailing system has teamed up with our shipping software system and the new Dell Venue 11 Pro tablet to bring you the first shipping bundle of its kind ever to be launched in our industry.

This flexible bundle allows you to manage your mailing and shipping needs with the ability to multi-task your other business initiatives.

The Dell Venue 11 Pro tablet offers the same timesaving, cost-efficient functionality of a desktop computer with a twist of mobility. FP's MailOne 2.0 software allows users to save time with its all-in-one, 4x6" shipping label that combines postage, addresses and confirmation barcodes. Enjoy additional savings with MailOne 2.0's Commercial Base Pricing.

The award winning PostBase is a new breed of postage meter, raising the bar for simplicity, flexibility and good looks. Sporting an intuitive touch screen, smooth jam-free operation, "simple-sleek" appearance, and scalable options, PostBase is a remarkably good fit for nearly any small-to-mid size business.

The 4x6" shipping label printer has a powerful, yet user-friendly software that has a variety of included barcodes and also integrates with Microsoft Outlook, Word and Excel. This shipping label printer is the perfect compliment to MailOne 2.0's 4x6" all-in-one shipping label capability.
